Introduction

Welcome to the Workday Editorial Guide for EMEA. In this document you'll find detailed guidance on how to express Workday in words as a brand – including voice and tone, style rules, product references and more.

This guide is designed for anyone writing content for Workday and should be used in addition to the Workday Brand Guide and other internal messaging documents.

General Writing Guidance

Tone of voice

Our tone of voice is derived from our four personality characteristics: genuine, powerful, pioneering and jubilant.

The following is a snapshot of our tone of voice. For more guidance and examples, see the Workday Brand Guide.

Genuine

Human, Approachable

We speak to you, person to person

When speaking, genuine is human. We put people first and always strive to build a sense of trust within our community. That means taking ourselves and our work seriously and always following through with integrity. Because, like our customers, we believe in letting our actions speak louder than our words – and that overpromising makes you sound arrogant and foolish. We'd rather win trust by leaving your work day a bit brighter than you found it.

- ✗ Don't use corporate speak or jargon
- ✗ Don't overpromise or be pompous
- ✓ Do emphasise sincerity and genuine intentions
- ✓ Do make people feel seen by celebrating wins and being there to solve challenges

Example:

Workday Adaptive Planning – sounds like a plan

Powerful

Confident, Intelligent

We instil confidence and trust

There's weight to this work, a level of influence and substance that makes each day worthwhile. We need to have the confidence of a global player and the ambition of an

upstart challenger. We carry ourselves with confidence, knowing we have the capability to make big things happen.

- ✗ Don't disparage the competition
- ✗ Don't push into arrogance, spark controversy or make outlandish statements
- ✓ Do speak with conviction and emphasise our strengths
- ✓ Do own our ambitious, forward-looking mentality

Example:

See the future. Make it real.

Pioneering

Innovative, Enterprising

We focus on the future

We're always looking ahead – ambitiously seeking brighter solutions and always anticipating what's on the horizon. We're nimble, forever flexible and dynamic in how we create new possibilities at work.

- ✗ Don't act edgy for the sake of it
- ✗ Don't tout ambitions we can't realise
- ✓ Do convey a sense of momentum and aspiration
- ✓ Do keep our commitment to innovation front and centre

Example:

Look forward. Look to Workday.

Jubilant

Spirited, Optimistic

We brighten your day

We aim to create an experience that leaves you inspired to take on the day. We bring an effortless humanity to the table – a powerful differentiator in our field that allows us to be light and even humorous at times. We also use tools such as Gen AI to save you 10 hours of work, because saving time is delightful. Inherently optimistic, we seek out possibility with positivity.

- ✗ Don't force puns or jokes
- ✗ Don't oversteer into levity or flippancy
- ✓ Do write with optimism, cleverness and sometimes humour
- ✓ Do capture the joys of small but meaningful moments in a day's work

Examples:

Cat's out of the bag – a look at PUMA's new office.
So much to do. So much time to do it.

A word on being bold

Background

In recent years, we've focused on being bold in our marketing. While we continue to be a leader in our industry and have earned the right to carry ourselves with confidence, we want to be mindful of our commitment to always take the high road as a brand. Here are a few things to keep in mind as it applies to writing boldly going forward.

Think of 'powerful' as our articulation of bold

Refer to the write-up covered in this section as well as the more detailed guidance and examples in the Brand Guide for an understanding of how bold comes to life as powerful.

Don't disparage the competition by name

While it's fine to call out the shortcomings of traditional software vendors, in general we do not call out our competitors by name, particularly in any way that could be perceived as mean-spirited or disrespectful. Rather, we focus on playing

up our strengths and how Workday is uniquely suited to solve customer challenges.

Exception: There may be instances where we're creating very targeted work.

Keep innovation in focus

Our commitment to continuous innovation is deeply woven into our DNA as a forward-thinking company. Make sure innovation comes to the forefront in everything you write, particularly highlighting our innovation in AI wherever possible.

Let results do the heavy lifting

Surface compelling value stats, proof points and customer results to tell our stories for us. Wherever possible, try to identify claims that only we can make and spotlight our unique differentiators in a crowded marketplace.

A word on writing for the oCFO

Guidelines

In general, be direct with the oCFO audience instead of playful or overly clever. Managing a company's money is serious business and we want our audience to know we understand that.

However, that doesn't mean we can't write conversationally and avoid overly technical jargon. But we should play up specificity and business impact over witty headlines – and be careful not to use too much vague marketing 'fluff'.

Audience

It's also important that we understand the different audiences and functions within the oCFO.

Accounting	Finance/FP&A
Responsible for tracking and reporting on the financial transactions of a business.	Responsible for evaluating how monetary resources, investments and assets are being used at an organisation, with a focus on maximising profitability while minimising risk.
Target audience for financial management product	Target audience for planning product
Looks back at what has happened already.	Looks forward to how the business should invest.

Additional reminders

We do this:

Consider whether we're writing for someone whose role is in Accounting, finance/FP&A or procurement, or who serves as controller. If we need a broad label, it's best to use 'oCFO', but if that's awkward in the context, it's okay to rephrase to focus more on 'financial products'.

Use 'financial' (singular) to describe our products for this audience.

Use 'finance leaders' when speaking very broadly across functions and products, while always considering if we should be more specific for the intended audience. We can also be more specific by using 'finance and accounting leaders'.

We don't do this:

Use 'finance' as a catch-all for audiences under the oCFO. Use 'financials' (plural) to describe our products for this audience.

A word on writing for developers

Guidelines

Developers don't want to be marketed to. Full stop. So when writing for this truth-seeking audience, keep it real and write like a human. Think of the developer as your most sceptical

friend. No promotion, no platitudes, nothing polished. Being direct with a dash of fun is the assignment.

Audience

Developers want to solve problems and achieve technical mastery. They want to be taught. They want to knowledge-share with their community. In short, they want to know, 'How does this make my code better, faster or more scalable?'

We do this:

✓ Show, don't tell.

- Yes: Build an agent in under 90 minutes.
- No: Our AI tools are the best.

✓ Write authentically and with specificity.

- Yes: Pull worker data with WQL.
- No: Optimise your enterprise data process.

✓ Use action-oriented copy.

- Yes: Deploy apps with the CLI.
- No: The CLI allows you to deploy apps.

✓ Guide them to knowledge; challenge them to improve.

- Yes: Master orchestration; cut your logic steps in half.
- No: Check the docs for orchestration info.

✓ Be explicit about how we're going to help them be successful.

- Yes: Automate testing. Ship faster.
- No: Our tools help you reach your goals.

We don't do this:

✗ Use marketing jargon or enterprise slang.

- No: Leverage our holistic ecosystem to drive digital transformation.
- Yes: Use Workday Extend to build custom apps.

✗ Use vision statements without reframing and using selectively.

- No: It's a new work day for agents.
- Yes: Learn to build agentic workflows. It's a new work day.

✗ Overuse pseudo code or write pseudo code that's syntactically incorrect.

- No: Future.build{ready}.
- Yes: {Build} for the future today.

✗ Use cute, fluffy language.

- No: Sprinkle some AI magic onto your not-so-winning workflows.
- Yes: Automate complex workflows with agentic logic.

A word on writing about AI

Workday AI

For clarity and ownability, we use the term 'Workday AI' when referring to our umbrella AI brand. Using 'Workday' before 'AI' is only required in the first mention. Subsequent mentions can drop 'Workday'. See examples below.

First mention:

- Today, we'll share how Workday AI is leading the way in the future of work.
- Workday AI automates routine tasks and elevates human potential.

Subsequent mentions:

- This is AI that actually understands work.

Sunsetting the branded term 'Workday Illuminate'

Workday AI will replace Workday Illuminate as the AI umbrella brand. This will be a rolling transition. You'll see Workday AI start to show up across our touchpoints as we evolve our story. That said, 'Illuminate' does not need to go away entirely. It can still be used as a verb, as in how 'Workday AI illuminates work'. It will also still live on in our event portfolio with the existing EMEA-based executive event, 'Illuminate Work'.

When it comes to updating your decks and docs: because 'illuminate' is used as a verb in some cases, we do not recommend simply using a search and replace tool. Please make your changes case by case.

Referring to agents

When 'AI' and 'agents' are used in close proximity, you can use 'agents' on its own as people will understand based on the context.

Examples:

- The AI platform for your people, money and agents.
- Manage your people, money and agents on one AI platform.

It is fine to precede 'agents' with 'AI' when needed for context.

Examples:

- AI agents for the assist. Humans for the win.
- We're developing role-based AI agents to transform work.

Referring to AI in general

When referencing AI technology in general, simply use 'AI' since the acronym is widely understood.

Examples:

- Workday is an industry leader in the use of responsible AI.
- We do AI for business like nobody's business.

We also style any mentions of generative AI like this: Gen AI (note capitalisation and spacing). Agentic AI can also be mentioned broadly as a category of AI technology but use sentence case 'agentic AI' (unless it's beginning a sentence).

Referring to machine learning

We do not group AI and ML together like 'AI and ML' or 'AI/ML'. ML is a subset of AI so grouping them this way can make it look like we don't know the difference between the two technologies.

Instead, we use 'AI' to encompass both our AI and ML capabilities together and only use 'machine learning (ML)' in specific instances where we are only writing about ML. Spell it out on the first mention and include the acronym: machine learning (ML).

Additional reminders

We do this:

Use 'responsible AI' (RAI) when referring to how Workday designs, builds and teaches AI models to align with ethical principles and trustworthy AI principles. The acronym 'RAI' can be used after indicated at first spelled-out mention.

We don't do this:

- Say we prevent bias – it is impossible to prevent bias. We do say that we reduce the risk of bias through our responsible AI practices and that we are the only major cloud HCM and financial management provider that offers transparency into how AI models are designed and tested.
- Describe the data we use in AI as 'our data'. This suggests that Workday controls the data; in actual fact, our customers do.
- Focus on our AI as being embedded in the core of our platform. It's still true of our product, but it's no longer differentiating in the market.

Workday GO guidelines

Background

'Workday GO' is the name for our go-to-market offering for midsize organisations. It includes our all-in-one solution for HR and finance, as well as our preconfigured, fixed-fee packages designed to help midsize organisations go live fast.

Workday GO is branded with a unique name and visual identity to allow us to bring more attention to the power of our solution for mid-market companies.

Additional reminders

We do this:

- Use all-caps 'GO' in any running text to align with the wordmark.
- Use 'midsize organisations' as the primary identifier for this audience.
- Use the word 'launch' or 'go live' instead of 'deployment'.

We don't do this:

- Position Workday GO as a product or another name for our ERP. It's our offering of preconfigured, fixed-fee packages for midsize organisations built on best practices and designed to get them live fast.
- Use 'growth' or 'emerging' as external identifiers for this audience.

VIBE Value Inclusion & Belonging for Everyone

Background

Diversity isn't just a business imperative. It's core to everything we do at Workday.

Our commitment to building a more equitable world shines through in our everyday practices. Our approach to diversity is about embracing everyone. From building a culture where all employees can bring their best selves to work, to deploying diversity initiatives that support everyone, we're doing what we can to help build an inclusive world for all.

While the industry as a whole typically refers to diversity initiatives as 'Diversity and Inclusion' (or D&I), at Workday, we use 'Belonging and Diversity' (or B&D) as an umbrella name for these initiatives and the overall name for our technology solution.

At the heart of these initiatives and the technology solutions is an approach we call VIBE Value Inclusion & Belonging for Everyone™, where every Workmate is valued for their unique perspective and where we all collectively contribute to the company's success. We do this by hiring and developing diverse talent, cultivating a culture of belonging, strengthening our communities and building inclusive products and technology.

Our VIBE programme offers educational resources and workshops, promotes a valued sense of belonging through our Employee Belonging Councils (EBCs) and more. We're also investing in VIBE technology capabilities to help create great workplaces for everyone.

Trademarks

Because the VIBE approach is unique to Workday, we want to protect it with trademarks. The VIBE approach includes:

VIBE®: This is the proprietary Workday approach to belonging and diversity. It includes internal programmes, external webinars and workshops, and our technology solution for tracking diversity and inclusion metrics within customer organisations.

VIBE Index™: Provides metrics that help companies assess and evaluate their belonging and diversity performance across various factors including talent, leadership and culture.

VIBE Central™: One central place in Workday to monitor and manage belonging and diversity efforts through a series of dashboards and dashboard worklets, including diversity dashboards, pay equity analysis, pay equity reporting and surveys.

VIBE Score™: An average of the Group and Outcome scores in the VIBE Index.

Rules

The consistent use of VIBE brings continuity and strength to the message. When writing about VIBE, please follow these DOs and DON'Ts:

We do this:

- Add the superscript registered symbol (®) to the acronym VIBE® at first mention in body copy. Add it to the header if that is the ONLY mention in your document.
- In longer documents (for example, 4 pages or more), use the trademark once or twice more – this serves as a subtle 'reminder' to the reader the further they get from the first trademark in the beginning of the document.
- Either start with the acronym or the phrase, depending on the context of what you're writing. For example, VIBE® Value Inclusion & Belonging for Everyone. Or Value Inclusion & Belonging for Everyone (VIBE®).
- Use the word VIBE as a noun. For example, 'VIBE is unique to Workday.'

- Use the trademarks consistently across communications.
- Use the VIBE graphic (see below) in internal communications – in this case, the trademark would appear as subscript: VIBE™.
- Only use the VIBE graphic when writing about VIBE for internal-facing communications. Include VIBE® and VIBE Value Inclusion & Belonging for Everyone™ – the latter if the graphic is used – VIBE Index and VIBE Central in the copyright text at the bottom if they appear in your asset(s).

We don't do this:

- Use the VIBE acronym, spelled-out phrase, or graphic as part of a sentence in running text. For example, 'At Workday, we're all about the VIBE!'
- Change the spelling, or add the trademark to any other variation of the acronym or spelled-out phrase. For example, 'At Workday, we're VIBE-ing™!' OR 'At Workday, we are Valuing Inclusion & Belonging for Everyone.™'
- Use the 'Together WE VIBE graphic.' It is no longer approved for use, as it breaks the above rule about using VIBE as a verb.
- Use 'VIBEs.'
- Use 'Valuing,' such as, '...valuing inclusion & belonging for everyone.'
- Insert the trademark symbol repeatedly at every mention of VIBE or the spelled-out phrase – first mention only, or sparingly in longer documents as mentioned in bullet number two in the DO list above.

Legal

Each copyright footer should be tailored to reflect the trademarks used in the copy of your asset. The updated Workday logo is not a registered trademark yet, so please use the following default language until further guidance:

©2026 Workday, Inc. All rights reserved. WORKDAY and the Workday logos are trademarks of Workday, Inc. All other brand and product names are trademarks of their respective holders.

Additional tips and reminders

Beyond the basics of good writing, it's important to consider which techniques are most effective in different formats. Here are some quick tips and reminders depending on what you're writing.

Advertising

Advertising is one of the places we especially bring our jubilant tone to life. Bring personality, clarity and a conversational tone to all advertising copy. And consider how to stand out from the crowd with a unique or memorable turn of phrase while speaking to the real challenges our audience faces.

Emails

The first challenge is to get someone to open your email. Carefully craft engaging subject lines and headlines that create intrigue rather than provide a summary of the email's content. The same principle applies to the email body copy. Tee up the offer or asset but don't overly summarise. Leave a reason for the recipient to take action.

Events

Each of our events has a slightly different audience, calling for a slightly different tone. In general, event writing can bring more personality and humour to the table. Even when writing for more elevated events, make sure to convey warmth and welcome and avoid coming across as stuffy or corporate.

Web pages

Assume that people will not consume content from top to bottom; rather, they will scan the page, giving the most attention to headlines first. Make sure headlines balance cleverness with clarity and convey the most important information. Consider how to break up text and leave plenty of breathing room. And always keep SEO in mind.

Video

All our writing should be conversational but nowhere is it more important than when writing for video deliverables, whether the final deliverable has VO, on-screen text, or a mix of both. Write casually, as if you are speaking to a friend. Vary sentence length and pacing, and make wise use of interjection, rhetorical questions and even humour.

General Proofreading Guidance

What to look for

Design and copy need to complement each other. Following are some guidelines on what to look for when proofing a layout of any asset type.

Copy checks

- **Hyphen breaks:** When a line ends with a hyphen, ask the designer to rewrap the line to avoid.
- **Line length:** If the copy block runs the entire width of the page, it is too long for readability. Ask the designer to reformat into a more stacked format and indicate where to break the copy.
- **Paragraph length:** If a paragraph is too long (you will have to use best judgement given the asset), indicate to the designer where to break into another paragraph, ensuring it reads correctly.
- **Missing end punctuation:** Sometimes a full stop or quotation mark will fall off by accident so ensure all paragraphs end with punctuation.
- **Alignment:** Make sure all paragraphs are in alignment.
- **Word and line spacing:** Check carefully for extra spaces between words, for unequal line spaces and for missing spaces between words or words and punctuation.
- **Footers:** Ensure the correct footer is used on each page.
- **Pagination:** Make sure the pages are numbered correctly.
- **Table of contents:** Ensure page numbers in the content page correspond to the correct section in the copy.

Design checks

- **Check design against copy doc:** Do a quick pass to make sure all the copy was used and appears in the correct order.
- **Data bursts:** These are graphical 'burst' elements that usually include a short stat or percentage. Generally speaking, these do not include end punctuation.
- **Stats:** If a percentage or other stat is the graphical element and includes copy under it that 'completes' the statement, the first word of the copy should be lowercase. Do not use end punctuation.
 - For example:
 - [graphical circle: 87%]
 - [copy under circle] of organisations are AI-ready
- **Pull quotes:** Designers often use one large orange quotation mark as a graphical element to indicate a quote. In this instance, there should NOT be any 'normal'

quotation marks at the beginning or end of the quote – the large single graphical quotation mark suffices.

- **Customer/company logos:** When logos are used in quoted stats vs. a person's name, ensure that the logo placement makes it clear which company made which statement.
- **Use of italics:** Generally speaking, we never use italics in copy.

Proofing legal documents

Legal documents such as event contracts, Workday policies, etc. follow separate rules than most of our other asset types. In other words, except for an explicit typo, all punctuation and capitalisation should remain as is. If you are unsure about whether or not to correct something, highlight it and use the comment feature to ask and include your suggested edit.

Workday Editorial Style

Calls to action

A call to action (CTA) is the linked text within copy in all types of assets. Workday style uses two to four short words, title case and no end punctuation. You can find additional information about **business process framework** CTAs on the [Digital & UX Documentation resources](#).

Note: Hyperlinked text within body copy remains sentence case.

Approved CTAs based on asset type

Article	Assessment	Blog Post	Case Study
Read Article	Read Assessment	Read Blog	Read Case Study
Customer Story	Datasheet	Demo (Quick and Extended)	eBook
Read Story	Read Datasheet	Play Demo (X:XX)	Read eBook

CTAs for customer success carousel (on overview web pages)

Infographic, Customer Case Study, Etc.	Video
Read Story	Watch Video (X:XX)

Casing & capitalisation

For headings, subject lines, email subject lines and similar, we use sentence case, not title case.

- *Example:* Join us for Workday Elevate London

Citing sources

When citing sources, use the following formats accordingly, noting punctuation.

[Company Name], ['Asset Title'], [Year].

[Author; if more than one given, list in alpha order by last name], ['Asset Title']; [Year].

Colons

When a colon is used within a headline or subhead, cap the word following the colon.

- *Example:* Embracing the transition: Organisations are well on their way

When a colon is used within a sentence, lowercase the word that follows the colon.

- *Example:* Make no mistake about it: without the right tools in place, it can be difficult to meet your business goals.

When a colon is followed by a proper name, a quote or an extract (that is, a selection of text from another piece of writing), or introduces two or more sentences or a direct question as in the example below, capitalise the word following the colon.

- *Example:* If you're looking for a financial management system, ask yourself: Why look anywhere else but Workday?

Commas

In EMEA, we do not use the Oxford (or serial) comma to avoid ambiguity.

Dashes

Use an en dash (–), not a hyphen (-), without spaces on either end to indicate continuing or inclusive numbers and date ranges in tables or where the range stands alone, such as in an event schedule. Note: we don't use em dashes (—).

- *Example: 12–14 July 2026*
- *Example: Pages 56–64*
- *Example: 11:00–15:30*

In running text, don't use an en dash if the first part of the range is preceded by 'from'. In this case, insert 'to' before the second part of the range.

- *Example: The event runs from 14 July until 16 July.*
- *Example: Mary went to university from 2005 to 2008.*

In running text, don't use an en dash if the first part of the range is preceded by 'between'. In this case, insert 'and' before the second part of the range:

- *Example: I'll have lunch sometime between 14:00 and 16:00.*

Dates, months and days of the week

Express dates as cardinal numbers, not as ordinals.

✓ The holiday event is on 25 December.

✗ The conference is on 2nd June.

Spell out months.

Exception: In tables where space is limited, use abbreviations for months as follows: Jan., Feb., Mar., Apr., May, June, July, Aug., Sept., Oct., Nov., Dec.

A complete date (consisting of a day, month and year) should not include a comma.

- *Example: Richard left on 1 July 2026 and didn't return for 10 days.*
- *Example: Richard is away from 1–10 July 2026.*

Abbreviations

When space is restricted and days of the week must be abbreviated, use the following formats:

Mon., Tues., Wed., Thurs., Fri., Sat., Sun.

Decades and centuries

Decades

To indicate a decade, add an 's' without an apostrophe.

- *Example:* The building was constructed in the 1930s.

To abbreviate a decade, precede the last two digits with an apostrophe.

- *Example:* These buildings were built during the '30s and '40s.
- *Example:* The consultant started a new career in the mid-'90s.

Centuries

Spell out centuries instead of using ordinals. Use hyphenation as indicated in the examples below.

Correct examples:

- The twenty-first century has seen significant advancements in green technology.
- The eighth century saw great changes among civilisations.
- Twenty-first-century sustainability efforts among organisations have significantly improved.

Incorrect example:

- The 21st century has seen significant advancements in green technology.

Event titles and descriptions

Workday Altitude®

Annual conference for our partner ecosystem. Usually three days.

Workday DevCon

Our annual conference for developers, engineers, integration consultants, IT leaders, architects, project leaders, modellers and data scientists – as well as Workday employees – who create solutions and apps based on the Workday platform.

Workday Elevate®

Invite-only global event series for prospective customers. Usually one day. Note the ® mark should be added in copy in the first and most prominent use in any asset. This could be in the headline or body.

Workday Rising*

Largest annual conference for customers, prospects and partners in the U.S. Usually four days.

Workday Rising EMEA*

Largest annual conference for customers, prospects and partners in EMEA. Usually three days.

Note: The word 'Workday' must precede Altitude, Elevate, DevCon, Rising and Rising EMEA on every mention throughout a document. For the events with registration marks, the registered trademark only needs to appear at first mention. For those without registered trademarks (for example, Workday Rising EMEA) it's allowed because the registration is represented in the logo lockup for the event.

Workday Sales Club

Annual invite-only getaway for top performers (mainly Sales). Usually four days. (Sales Club is OK on subsequent mention).

Workday Sales Kickoff, Workday SKO or SKO

Annual internal sales kickoff event, mainly for Workday salespeople. Usually three days. Even though it's an internal event, it's nice to use the full 'Workday Sales Kickoff' at first mention in your document. Subsequently, the less-formal 'Workday SKO' or 'SKO' references are allowed. 'SKO' without 'Workday' preceding it is OK on subsequent mention.

Workday Innovation Summit

Annual invite-only event for Workday analysts. Usually two days. 'Innovation Summit' is OK on subsequent mention.

*When referring to Workday Rising and Workday Rising EMEA, do not precede or follow it with the year.

- ✓ Please join us at Workday Rising.
- ✗ Please join us at Workday Rising 2026.
- ✓ Please join us at Workday Rising EMEA.
- ✗ Please join us at Workday Rising EMEA 2026.

Subsequent body copy is where you can insert the year for clarity, as long as it doesn't precede or follow Workday Rising/Workday Rising EMEA:

- *Example:* [header] Join us for Workday Rising EMEA
[body] We're looking forward to seeing you at Workday Rising EMEA, taking place in November 2026.

Fiscal years

When referring to fiscal years, use the following formats for quarter and year, or just year.

- *Example:*
Q1 FY27
FY27

Fractions

In running copy, always spell out fractions; do not use numbers.

- *Example:* Research shows that two-thirds of UK financial institutions believe in the benefits of AI.

Note: When referring to one-third, use 'one-third' NOT 'a third.'

Hashtags

Use hashtags only to indicate ranking or in social copy. Do not use a hashtag to indicate a booth number for an event or a numerical sequence – just use the number (i.e., booth 1234; Myth 1, Myth 2, as in the examples below):

✓ Workday was ranked #1 in enterprise resource planning system once again.

✗ Stop by Workday booth #1234 at HR Tech.

✗ Myth #1: Cloud-based ERPs are only for LEs.

✓ Myth 2: Cloud-based technology is too expensive for small businesses.

Hyphenation and hyphenation with prefixes

Hyphens are joiners. Use them to avoid ambiguity or to form a single idea from two or more words. Check the 'Glossary of terms' section and the dictionary. If your word isn't in either resource, use the following guidelines to help you decide whether or not to use a hyphen.

- Unless a hyphen is required for clarity, keep compound nouns open – for example, 'hard drive' or 'water bottle.'
- Never use a hyphen after modifying adverbs that end in ly, such as 'closely' in the phrase 'closely related.'
- Generally, hyphenate compound modifiers when they occur before their object but not after it: 'a forward-thinking strategy,' but 'the strategy is forward thinking.'
- Do not use a hyphen as a short form of 'to' – spell out these words: steps 3 to 8, not steps 3-8. See also 'Dashes.'
- Always hyphenate words with the following prefixes: 'ex' (meaning 'former'), 'omni,' 'quasi.'
- Hyphenate words that have two different meanings with and without a hyphen, even though they are spelled the same: 're-creation' vs. 'recreation,' 're-cover' vs. 'recover.'
- Hyphenate compounds in which the second element is a numeral or a proper noun, such as 'non-Workday events.'

Instructing users/UI tips

When instructing customers to take some action or perform steps, use consistent terminology regardless of medium – whether it's email, newsletters, on-screen or otherwise.

Referring to on-screen elements

When referring to the label or text of on-screen elements, such as action buttons, links and checkboxes, follow these guidelines:

- Use the same capitalisation in text as the capitalisation of the on-screen element. For example, if a button uses title case (meaning all significant words are capitalised), use title case if you refer to the button.
- Bold the on-screen elements.

Examples:

- Click the **Refresh** button to update the progress indicator.
- Access the **Create Earning or Create Deduction** task.

Lists (bulleted, numbered, run-in)

Only use lists if you have two or more items. You can use three types of lists: bulleted, numbered and run-in. Each one is described below, but here are four instructions for lists:

1. Introduce a list with a lead-in sentence. It's OK to introduce a numbered or bulleted list with a sentence fragment ending in a colon. In this case, make sure each list element completes the sentence.
 2. Use sentence-style capitalisation for lists.
 3. Use no more than two levels of indentation.
 4. Keep items in a list parallel in construction, meaning that all items should be sentences or phrases with the same construction – that is, each one is in the same tense and begins with the same part of speech (verb, noun, adjective).
- *Example of correct parallel construction:*

All listings display the following information:

- Name
 - Relationship to the employee
 - Years at the company
- *Example of incorrect parallel construction:*
All listings display the following information:

- Name
- State your relationship to employee
- Years at the company

Bulleted

If the sequence or number of items is not important, use a bulleted list rather than a numbered list to display the items clearly for the reader. Bulleted lists may be used for simple or detailed information.

Insert punctuation – a full stop or question mark – at the end of all bullets that are complete sentences. Otherwise, don't use punctuation.

Then, remember to be consistent. If the first bullet is a complete sentence, make each bullet in the list a complete sentence followed by punctuation. If the first bullet in the list is a fragment, make each bullet in the list a fragment and don't use punctuation.

In general, try to limit the number of bullets in a list to three or four. The following examples illustrate the correct usage of bulleted lists.

- Each bullet will be a complete sentence; it's OK to use full stops here or if preferred, you can leave off (per style)
- Some bullets in the list will contain 1 or more sentences that require punctuation; in this case, defer to a full stop on each bullet for consistency

As stated above, if the bulleted items follow a lead-in phrase with a colon, do not use punctuation whether or not the bullets are fragments or complete sentences.

In demand-gen emails: try to limit the number of bullets in a list to three max.

The following examples illustrate the correct use of bulleted lists.

Example:

The webinar will cover a number of topics, including:

- The changing requirements for an HR system-of-record
- The areas in which HR will be spending money in 2026
- The top five considerations for HRIS in the current economy

Example:

The package includes:

- Software
- Hardware
- Middleware
- Cords and plugs

Numbered

Use numbered lists for information that requires a sequence of events: instructions, procedures or the explanation of a process. For instructions, keep the steps clear and easy to follow. Avoid breaking the flow of numbered steps with lengthy explanations or descriptions that belong at the beginning or end of the steps.

You can also use a numbered list when the introduction specifies the number of items.

- *Example:*
Steps for setting up an integration:
 1. Create account-specific integration systems for each combination of company and payment type.
 2. Assign each integration system to the appropriate payment type in each account.
 3. Create a generic integration system.

Run-in

Embed run-in lists in the text rather than indenting them separately. Mark them with letters or numerals. Use run-in lists sparingly because they are sometimes difficult to follow. Place parentheses around any numerals (for sequential information) or letters (for non-sequential information) and punctuate the list as you would normally without the numerals.

- *Example:*
A warning is issued in certain conditions when: (a) the field is not blank, (b) less than 20 percent of data is in the file and (c) the file contains more than the minimum number of records.

Measurement

Spell out units of measure in text (such as inches) unless the abbreviation is used more commonly than the spelled-out form (such as mm). For example, use 'inch' in ordinary text. Use the inch symbol (") and foot symbol (') for literal values on the screen, in an illustration, or in a table. (These are formally known as double-prime and prime, respectively.)

- *Examples:*
22 lbs
45 cm

When a numeral and a unit of measure form a compound adjective, hyphenate the compound.

- *Example:* This parameter provides a 60-second interval between monitoring runs.

The following are abbreviations for units of measure, their derivatives and examples of their usage. Note space between number and unit of measure.

Abbreviation	Derivative	Usage
cm	centimetres	The part measures 6 cm.
dpi	dots per inch	An adequate printer can produce 600 dpi.
g	grams	The final yield was 7.6 g.
GB	gigabyte (1 billion)	Users must have 50 GB disk space.
GMT	Greenwich Mean Time	12pm in Seattle is 20:00 GMT.
h	hours (metric units)	The image was digitised at 220 cm ² /h.
Kbps	kilobits per second	Data transfer rates can reach 53 Kbps.
K	kilobyte (1,024 bytes)	At 244 K this is a relatively small file.
m	metres	The ordinary cubicle is 2.5 m on a side
mm	millimetres	A4 paper measures 210 x 297 mm.

MB	megabyte (1 million)	You will need at least 128 MB RAM.
MHz	megahertz	The new 450 MHz processors are standard.
TB	terabyte (1 trillion)	High-capacity data storage is 1 TB or more.

Numerals

In general, spell out numbers zero to nine and any number that begins a sentence, and use numerals for 10 and up.

Use numerals for measurements, percentages and technical specifications, even if those numerals are zero to nine.

- *Example:* 9.5-foot shark
- *Example:* 8 point Helvetica type
- *Example:* 5 percent productivity gain

Note: If space is tight or you need to call attention to a figure or fact, particularly in headlines or email subject lines, digits can be used for numbers and ordinals below 10.

When using ordinals, spell out numbers first to ninth and use numerals for 10th and up. Do not make the endings -nd, -th, -rd or -st superscript and don't abbreviate.

- *Example:* 23rd (not 23d or 23rd) edition
- *Example:* 17th annual fundraising party

When numbers 0 to 9 or 10 and up appear in the same paragraph or sentence, defer to numbers for consistency:

- *Example:* Documents range from 9 to 15 pages.

When referring to a Workday update, use the format below

- *Example:* See the new features of Workday 2026R1.

Use numerals to refer to a place named in the text or on the screen.

- *Example:* Chapter 7
- *Example:* Column 22

Large and very large numbers should be expressed in numerals followed by million, billion and trillion, even if that number falls between 0 and 9:

- *Example:* 5 billion people

When referring to dollar amounts and if space is an issue, you can use the capital letter K, M, or B (thousand, million, billion) closed up to the numeral, as follows:

- *Example:* Annual earnings of \$10M

If expressing a number greater than 999, use a comma.

- *Example:* 1,200 years ago

Avoid starting a sentence with a number. If it can't be avoided, try to rephrase the sentence:

Avoid: 450 people participated in yesterday's webinar.

Rephrase: Yesterday, 450 people participated in the webinar.

Ages

Follow these guidelines when writing about the age of a person or thing:

When referring to the age of a person, always use numerals.

When referring to the age of an object, spell out the number if it is nine or lower; use numerals for 10 or higher.

When making a general reference to the age of a person, use numerals and the word years without an apostrophe.

- *Examples:*
The twins are only 4 years old.
The four-year-old company is successful.

Percentages

When you need to indicate percentages, follow these general guidelines. Note that depending on the type of asset, the symbol can be used vs. 'percent.' Use your best judgement:

In headers:

- Spell out 'percent' unless the design calls for the symbol

In running text:

- In copy where just a few percentages are referenced, spell out the word 'percent'. If several percentages are referenced, use the symbol, as it has more impact than spelling out 'percent' and saves space.

In design:

Usually the % symbol is more effective and preferred in assets with a lot of graphical stats; for example, in infographics, data bursts, ABM spreads etc. Also use the percent symbol in tables, charts, graphs, scientific or financial copy, quotes or when space is limited.

Note: Always use numbers with percentages, even if it's between 0 and 9, and even if it begins a sentence. However, in the case of the beginning of a sentence, try first to rephrase so you don't begin the sentence with a number.

Number ranges

When writing a range of numbers or dates, follow these guidelines.

In running text, use *from/to*.

- *Examples:*
This offer is valid from 1 July to 31 July 2026.
Pages 95 to 99 offer more information on company reorganisations.

If the range of numbers stands alone, such as in an event invitation or email, header and so on, use an EN dash closed up on each side.

- *Examples:*
07:00–08:00
1–7 July
Join us at the Open House:
6–7 July, 10:00–17:00

Personal titles

Always capitalise a personal title.

- *Examples:*
John Doe, Vice President of XYZ Company, will lead the session.
Session: Opening Keynote with John Doe, Vice President, XYZ Company

Phone numbers

UK phone numbers should be formatted as follows:

0203 318 2336

For international phone numbers, insert a plus sign before the country code, followed by the rest of the number. Note that using or not using dashes depends on the country:

- *Examples:*
Ireland: +353 1 2419900
New Zealand: +64-9-8010520
Singapore: +65 6809 5098
Japan: +81-3-4572-1200

Product names and listings, Workday sub-brands and products, and Workday master brands and products

Use the complete product name followed by its shortened name with acronym if you intend to use the shortened name with acronym elsewhere in your document; for example, Workday Human Capital Management (Workday HCM). On subsequent mentions of the product, Workday HCM is acceptable.

Don't refer to products without 'Workday'; for example, 'Workday Recruiting,' not 'Recruiting.' In subsequent mentions, however, you can use just 'Workday' to refer to the product.

Don't refer to Workday products in the possessive:

- ✗ Workday Financial Management's features provide . . .
- ✓ The features in Workday Financial Management provide . . .

Product lists

When listing both Workday Human Capital Management and Workday Financial Management in the same sentence, always put Workday Human Capital Management first. If referring to the general terms of HR and finance in the same sentence, put HR [caps] first, then finance [lowercase].

When listing several Workday products, whether in a display-type of list or within the same sentence, the word 'Workday' must precede each product name.

Exceptions:

Customer stories. In the sidebar that lists which products were used, do not precede each product name with 'Workday'.

Unspecified asset. If it becomes too repetitive in the context of an asset, you can precede the first product name in a list with 'Workday' but leave off on the following names.

Example: Workday Human Capital Management, Prism Analytics, Adaptive Planning, PSA.

Workday sub-brands and products

Workday has two sub-brands* through acquisitions: Workday Adaptive Planning and Workday VNDLY.

These sub-brands also have products. When referring to the actual product(s) under these sub-brands, use the full product name, as follows:

[sub-brand] Workday Adaptive Planning

- Products:
 - Workday Financial Planning
 - Workday Operational Planning
 - Workday Sales Planning
 - Workday Workforce Planning

[sub-brand] Workday VNDLY

- Products:
 - Workday VNDLY Extended Workforce Management
 - Workday VNDLY Statement of Work

Workday VNDLY Worker Profile Management

A sub-brand, such as Workday Adaptive Planning, should be used in copy similarly to how the Workday brand name is used. Sub-brand names can be used as a general reference to the sub-brand itself.

- *Example:*
Plan on moving business forward with Workday Adaptive Planning.

The sub-brand can also be used as a general reference to the brand or product.

- *Example:*
Workday Financial Planning helps finance budget, forecast and plan for whatever tomorrow holds.

Product names should be used at least once in any type of marketing asset. If you only have space for either the sub-brand or the product name, use the product name.

- *Example:*
Workday Financial Planning doesn't just put finance one step ahead but 1,000 steps ahead.

Workday master brands and products

[master brand] HiredScore

- Products:
HiredScore* AI for Recruiting
HiredScore* AI for Talent Mobility

Until further notice, add an asterisk as indicated above at first mention of HiredScore in an asset with the following disclaimer in a one-point-smaller font and in italics (usually at the bottom of the page where the mention appears):

** HiredScore is a Workday company.*

- *Example:*
HiredScore* AI for Recruiting with Workday delivers the agility your business needs.

**HiredScore is a Workday company.*

[master brand] Evisort

- Products:

Workday Contract Lifecycle Management, powered by Evisort AI.

Workday Contract Intelligence, powered by Evisort AI.

Take note of the 'powered by Evisort' descriptor following the first mention of the product. If appearing in a title case header, 'powered' would be capped, no period.

- *Example:* Workday Contract Intelligence, Powered by Evisort AI

For more-detailed information on how to refer to these sub-brands and products in copy, see the Workday Brand Guide.

* The term 'sub-brand' is hyphenated.

Pronouns – gender-neutral and more

Use these guidelines to choose the correct pronoun when referring to people or things.

Referring to people; gender-inclusive language

Workday style for people pronouns is gender-neutral. In other words, we should not assume a preferred pronoun.

In a document where you have introduced a person by first and last name, use their last name in subsequent mentions, as well as in quotes. Below is a hypothetical example of a person first introduced as Sally Smith, who is later quoted.

Example:

✓ "Workday HCM has made a big difference for us," Smith says.

✗ "Workday HCM has made a big difference for us," she says.

Pronoun approval: Generally speaking, in most instances it is easy to substitute 'she' or 'he' with the last name. However, sometimes it can sound awkward and a pronoun would be better. So if you are in a position where you interview people for blogs, podcasts, case studies, customer stories etc and would like to have the option to use a specific pronoun, please ask them their preferred pronoun so we can use it if necessary.

Be gender inclusive wherever possible. For example, when discussing a dress code, remove all reference to gender:

Example:

✓ Attendees are expected to wear a shirt and trousers, or a dress or skirt that falls below the knee.

✗ Men are expected to wear a shirt and trousers; women are expected to wear a dress or skirt that falls below the knee.

Referring to Workday

When referring to Workday the company, use the first-person plural pronouns we, us, our and ours.

- *Examples:*
View our tutorials.
Contact us with any questions or concerns.

Do not use the possessive with Workday (Workday's) in any communication (exception: documents drafted by Legal). Always recraft your sentence or phrasing to avoid it:

✗ Workday's standard for financial management drives business growth while managing costs.

✓ The Workday standard for financial management drives business growth while managing costs.

Quotes, pull quotes

For a quote in running text, supply the person's name, title and company.

- *Example:* Workday Chief Technology Officer said, "Workday is listed on the *Fortune* 100 Best Places to Work."

For pull quotes, the attribution should appear below the end quote. The use of an EN dash (no spaces) before the person's name, title and company is subject to design. If the design is such that the quote and name need to appear on one line, use the EN dash.

- *Example with EN dash below quote (both are correct depending on design):*
"Our company loves Workday."
—John Smith, Chief Executive Officer, XYZ Company
"Our company loves Workday."
John Smith, Chief Executive Officer, XYZ Company

Quotation marks

The general rule is to place full stops and commas inside quotation marks and to place colons, question marks and semicolons outside quotation marks, unless the quote itself ends with those punctuation marks.

- *Example:* Did Jill really say, "We'll meet our quarterly projections"? I heard Jill say, "Who can doubt it?" Jill then added, "We can do this."

To indicate a quote within a quote, use single quotation marks.

- *Example:* "I remember Joe saying, 'Your product is inspiring.'"

Time

In EMEA, we use the 24-hour clock format. When showing a date or time range, use an en dash.

- *Example:* The session takes place at 13:00–14:00.

Abbreviations for time zones: Use GMT for Greenwich Mean Time, BST for British Summer Time, CET for Central European Time and so on.

Treatment of asset titles

At Workday, we produce and refer to a range of assets including eBooks, datasheets, reports, webinars, whitepapers, videos etc.

When we refer to these assets we enclose them in single quotation marks – but do not apply any treatment to the title of an asset when it appears as a CTA or on the asset itself. For instance, we don't put the title of the whitepaper in quotes on the actual whitepaper. Only add the treatment in running text.

Terminology

Commonly used terms

It's important to refer to what we build at Workday consistently and accurately. Here is some guidance around the most commonly used terms.

AI Platform

Workday is the enterprise AI platform that helps organisations manage their people, money and agents. That's the way we describe our company, as well as all innovation built by Workday and on Workday.

ERP

While 'enterprise AI platform' is our company description, 'next-generation ERP' is our category positioning. This encompasses our powerful HR and finance suite, our AI that truly understands work, and our open platform that's designed for work.

Product

Use the term 'product' when referring to any software created by Workday.

Application

Do not use this term to refer to Workday software; use the term 'product' instead.

App

Use the term 'app' when referring to any products created by our customers or partners. You can also use this term to refer to the Workday mobile app.

Agent

Use the term 'agent' or 'AI agent' (note capitalisation) when referring to any products marketed as agents.

Solution

Try to avoid using this term for the majority of our products; one notable exception is for marketing Workday GO.

System

Do not use this term; when referring to Workday broadly, use 'AI platform' or 'next-gen ERP' instead.

Cloud

Do not use this term unless it's part of an asset title or part of content differentiating our multitenant SaaS approach from traditional on-premise software. It's best to focus on describing Workday as an 'AI platform' or 'next-gen ERP' instead.

Glossary of terms

Here are some examples of the style we use and how we treat words when writing at Workday.

#1	Use this format when referring to a ranking. Otherwise, use 'number one' (noun or adjective): Examples: Workday strives to be number one in customer service. Upholding the Workday core values is our number one priority.
&	Do not use in place of spelling out the word 'and' unless there is restricted space, such as in a chart.
24/7	Note slash.
AI: artificial intelligence	Not necessary to spell out on first reference but you can if you feel it's appropriate for the audience.
AI agent	Use the 'AI' when needed for clarity; otherwise, just use 'agent'.
ad hoc	Note two words, no hyphen all instances.
add-on (n., adj.) add on (v.)	Note hyphen when used as a noun or adjective. Two words when used as a verb.
agentic AI	Note capitalisation.
app/apps	Use when referring to mobile apps or to applications created by our customers or partners. OK to use when referring to the Workday mobile app. Do not use this term to refer to other software by Workday; use the term 'product' instead.
backup (n., adj.)	One word when used as a noun or adjective. Two words when used as a verb.

back up (v.)	
Beta beta	Capitalise as part of a product name. Lowercase when used generically.
big data big data analytics (BDA)	Note lowercase: not Big Data or Big Data Analytics unless 'Big' begins a sentence.
blog	Lowercase unless it begins a sentence.
Bluetooth	One word. Note capitalisation.
boot camp	Two words.
business process framework (BPF)	Note lowercase (not Business Process Framework). BPF is the Workday feature for managing approvals and policies. It is also a key aspect of Sarbanes-Oxley (SOX) compliance in Workday.
cancelled, cancellation, cancelling	Note the double 'll' format.
checkbox	One word, no hyphen.
check-in (n.); check in (v.) checkout (n.); check out (v.)	Note different formats for both words when used as a noun or verb.
clickable	One word.
click-through (n., adj.) click through (v.)	Hyphenated when used as a noun or adjective. Two words when used as a verb.
cloud	Lowercase, unless it begins a sentence ('Cloud-based applications are popular.'). Precede with 'the' ('Customers like the cloud.'). Unless it's modifying something ('Customers like cloud-computing technology.').
cloud computing (n.) cloud-computing (adj.)	Two words when used as a noun. Hyphenated when used as an adjective.
codeline	One word.
configuration	As a cloud-based system, Workday is a single technology platform that can be configured on an ongoing basis to meet a company's specific needs. Workday supports all configuration options.
data centre	Two words.
dataset	One word.
datasheet	One word.

decision-maker; decision-making	Always hyphenated.
deep-dive (n.)	Hyphenate for clarity, all uses.
deploy; deployment	Workday is deployed, not installed or implemented. Always use the word deploy or deployment rather than the words install/installed or implement/implemented.
double-check (v.)	Note hyphen when used as a verb.
double-click	Note hyphen.
drag-and-drop (adj.)	Note hyphens when used as an adjective. Not drag-n-drop or drag 'n' drop. Three words when used as a verb.
eBook	Note no hyphen, lowercase 'e' and capital 'B.' Keep lowercase 'e' even if it's beginning a sentence.
e-commerce	Note hyphen.
e.g.	Abbreviation meaning 'for example.' Note full stops.
email (n., v., adj.)	One word, no hyphen.
end user (n); end-user (adj.)	Note formatting when used as either a noun or adjective.
FAQ, FAQs	Either FAQ or FAQs is acceptable, as long as it is used consistently.
file name	Two words. Not filename.
finance	Lowercase unless beginning a sentence.
financial management	Use lowercase when referring to financial management in general terms. When referring to Workday Financial Management, always precede Financial Management with 'Workday' (Workday Financial Management) and never refer to this application as Workday Financials, Financials or FINS.
firsthand	One word, no hyphen.
frontline (adj.) front line (noun)	As an adjective, frontline is one word: The frontline workforce. As a noun, it is two words: We need to hire more workers for the front line.
FTP	Abbreviation for File Transfer Protocol. Acronym FTP is always OK.
Generally Accepted Accounting Principles (GAAP)	In the broadest context, GAAP is a term used to refer to the standard framework of guidelines for financial accounting used in any given jurisdiction and are generally known as Accounting Standards. The acronym GAAP is always OK.
GB	Abbreviation for gigabyte. All caps. Include a space between the number and GB.

Gen AI	Note capital 'G' and a space between 'Gen' and 'AI'; don't need to spell out 'generative.' Capitalise 'Gen' even if not beginning a sentence when within running text.
GIF	Acronym for Graphic Interchange Format. Generally used to refer to an image file with the file name extension .gif. All caps. Acronym is always OK. Plural: GIFs.
gigabyte	OK to abbreviate as GB.
go-live (n); go live (v)	Note hyphenation for noun form.
Governance, Risk and Compliance (GRC)	GRC refers to a relatively recent category of enterprise software solutions that evolved out of the more intense regulatory environment of the post Sarbanes-Oxley era.
headcount	One word.
home page	Two words.
how-to (n., adj.)	Note hyphen when used as a noun or adjective. Plural noun: how-tos. In title case, capitalise as How-To. At the start of a sentence, capitalise as How-to.
i.e.	Abbreviation meaning 'that is'. Note full stops.
implement	Don't use this word or any variation of this word when describing the deployment of Workday products. Use 'deploy' or other variations of 'deploy.'
inbox	Lowercase when used in general.
info	In general, use 'information' rather than 'info.' However, if space is tight, 'info' is acceptable.
Infrastructure as a Service (IaaS)	Use title case (Infrastructure as a Service); always spell out on the first instance and follow with the acronym.
International Financial Reporting Standards (IFRS)	IFRS is a set of generally accepted accounting standards for non-U.S. jurisdictions. IFRS are issued by the International Accounting Standards Board (IASB).
internet	Lowercase in all instances unless it begins a sentence.
JavaScript	One word. Note capitalisation.
keyword	One word.
knowledgebase	One word.
lifecycle	One word.
livestream; livestreaming; livestreamed	One word.
login (n., adj.)	One word when used as a noun or adjective.

log in, log in to (v.) logout (n., adj.), log out (v.)	Two or three words when used as a verb.
machine learning (ML)	Spell out (lowercase) at first mention, followed by (ML).
mashup (n., adj.) mash up (v.)	One word when used as a noun or adjective. Two words when used as a verb.
MB	Abbreviation for megabyte. All caps. Include a space between the number and MB.
Microsoft Excel®	Note registered trademark. Always precede Excel with Microsoft.
megabyte	OK to abbreviate as MB. Don't use Mbyte.
midsize	Not mid-sized and not hyphenated.
more than	Preferred rather than 'over.' Can use both in a sentence or paragraph when necessary.
off-site	Hyphenated.
OK	All caps. Okay is okay but OK is preferred. Do not use Ok, or ok.
onboarding	One word, all instances.
on-demand	Hyphenate in copy and CTAs.
online	One word, no hyphen. Not on-line, on line.
on premise; on-premise (adj.)	Not 'on premises.'
on-site	Hyphenated.
passphrase	One word.
Q&A	All caps, no spaces. Note ampersand.
real time (n.) real-time (adj.)	Two words when used as a noun. Hyphenated when used as an adjective.
SaaS	Since this acronym is well known, no need to spell it out. Using the acronym SaaS on first mention is OK.
Sarbanes-Oxley (SOX)	A 2002 U.S. federal law that established a broad array of standards for public companies, their management boards and accounting firms.
screenshot	One word.
seasons	Lowercase the names of seasons and derivatives (spring, springtime; winter,

(winter, spring, summer, fall)	wintertime). Don't include a comma between a season name and a year – for example, 'The next release will be in spring 2026.'
setup (n., adj.)	One word when used as a noun or adjective.
set up (v.)	Two words when used as a verb.
sign in, sign in to (v.)	When used as a verb, it's two or three words.
sign-in (adj.)	As an adjective, it's hyphenated.
sign out, sign out of (v.)	Two or three words when used as a verb.
sign-out (adj.)	Note hyphen when used as an adjective.
sign-up (adj.)	Hyphenate when used as an adjective.
sign up (v.)	Two words when used as a verb.
single sign-on (SSO)	Note hyphen. If the phrase is modifying, insert second hyphen: 'single-sign-on capability.'
skill set	Two words.
start-up	Noun, meaning new business. Note hyphenation.
total cost of ownership (TCO)	In most cases, spell out on the first instance and follow with (TCO). The acronym can be used in subsequent references.
touchpoint	One word.
troubleshoot	One word.
UK	Not U.K.
URL	All caps, abbreviation is always OK. Plural URLs.
U.S.	Note full stops, no space. Not US or U. S. The single exception is specifying currency in prices (US\$).
user	Try to avoid – consider customer, worker and so on when appropriate.
username	Lowercase, one word.
web page	Two words, lowercase.
webinar	Lowercase when used alone.
webinar replay	Use this phrasing when referring to a webinar that is not live.
website	One word, lowercase.
whitepaper	One word. Lowercase unless part of a headline, header, or subhead.

Workmates	Word used for internal-facing communications only. Capitalise.
worksheets	Note lowercase.
worktag; worktags	Lowercase, one word.
Wi-Fi	Note hyphenation and capitalisation.
Workday's	Avoid using Workday in the possessive. See 'Referring to Workday' in the 'Person and Pronouns' section.
worklets	Lowercase, one word.
