

Meeting Notes for India Research with Bernie (VP of Talent Product Management) - 25th Nov. 2024

Key Themes & Discussion Points:

1. High Volume & Fraud Mitigation:

- **"Know Your Candidate" (KYC):** This was a significant topic, analogous to "Know Your Customer" in banking, driven by a huge amount of fraud, especially concerning resumes and candidate information.
- **Resume Fraud:** Specifically mentioned handling 100,000 resumes per month, indicating the scale of this issue. Accenture is again highlighted as experiencing huge issues in this area.
- **Addressing Fraud:** Discussions likely centered on how Workday can help clients mitigate these risks.

2. Partnerships & Solutions:

- **BrightHire:** Mentioned as an upcoming partner.
 - Their solution records interviews and matches skills, which could help in validating candidates and ensuring consistency.

3. India Market Focus:

- **FY27 - India - TO (Target Opportunity/Turnover?):** This suggests a strategic focus or a significant milestone related to India around FY27. *You might want to clarify what "TO" stands for in this context.*
- **Localizations - Addresses:** Specific mention of a rollout for India concerning address localizations, indicating ongoing or planned product enhancements for this market.
- **India Product Gaps:** This was explicitly noted, reinforcing the need to address specific shortcomings for this region.

4. Regulations:

- The topic of "regulations" was brought up, likely in conjunction with KYC and fraud prevention, especially given the complexities of the Indian market.

5. Key People & Action Items:

- **Andre:** Needs to be consulted, likely regarding the India strategy or fraud issues.
- **Daian Rasmussen:** Name mentioned, context unclear from notes alone – possibly someone involved in product strategy or a relevant project.
- **Alexis (Solution Enablement):** Needs to be reached out to, perhaps for information on current capabilities or rolling out solutions.

- **Conall Markey:** Name mentioned, context unclear.
- **"Take a look in brainstorming":** Suggests reviewing internal brainstorming documents or sessions for ideas/solutions related to these topics.
- **"Check out the docs Bernie shared": This is an important action item for you.** You need to review the documents Bernie provided, as they likely contain relevant information for the topics discussed.

In Summary:

This meeting with your VP reinforces the critical need to address high-volume recruiting challenges, particularly resume fraud and compliance (KYC), with a strong focus on the Indian market. There's an emphasis on leveraging partnerships (like BrightHire) and specific product enhancements (like address localization for India). Several key people need to be looped in or consulted.

Remember to **review the documents Bernie shared**, as they are likely crucial to understanding the full context and any planned actions.
