

Interview with Santosh Gulia, Sr. Functional Consultant, Global Services - India Research - 11th July 2025

Interviewee: Santosh Gulia, Sr. Functional Consultant, Global Services

00:00:00.000 --> 00:00:21.942

David Denham: A few quick questions. But I won't. I won't stick too closely to the script. So just really looking to get just get a sense of really, where kind of maybe gaps that that you've seen from your experience are where we might have opportunities. And and yeah, I suppose it will be focused on India. So just to check. I know you'd mentioned you'd

2

00:00:22.270 --> 00:00:32.400

David Denham: You know you had experience deploying for North American customers. Did any of those customers have presence in India, or did you

3

00:00:32.409 --> 00:00:34.960

David Denham: need to play for okay, brilliant.

4

00:00:34.960 --> 00:00:35.440

Santosh Gulia: Yes.

5

00:00:35.440 --> 00:00:49.922

David Denham: Brilliant. And so, yeah, I suppose I'll just start me with the the 1st question, and it's really around high volume. So I'd just be keen to get from your experience.

6

00:00:50.710 --> 00:01:04.349

David Denham: you know. Have you deployed for any customers who were working with very high volumes of candidates, job applications, and maybe any, any challenges or gaps that that you might have observed during that time.

7

00:01:05.090 --> 00:01:23.819

Santosh Gulia: Yes, I would say not. All are on top of my mind. But yes, I I can just just give you a few pointers, and if needed, I can jot down all of them and send it across. So I would say, when we are dealing with India. The background check in India is quite

8

00:01:23.920 --> 00:01:41.260

Santosh Gulia: extensive, and it varies from customer to customer. So what we were thinking of, if at all, Workday gives the box, and I've seen that in roadmap. So at candidate home there is an option of some

9

00:01:41.500 --> 00:01:50.469

Santosh Gulia: box available for candidates to keep on attaching documents wherever recruiter is asking for, and that gets attached to candidate profile.

10

00:01:50.670 --> 00:01:53.609

Santosh Gulia: so kind of a field

11

00:01:53.870 --> 00:02:04.110

Santosh Gulia: for attachments, because in India again, company to company it varies, and it is very difficult to accommodate all these in processes

12

00:02:04.800 --> 00:02:15.680

Santosh Gulia: and in processes again, when we go by business process. Usually we have to put in a review step where we would tell candidate to review something and attach.

13

00:02:15.830 --> 00:02:36.220

Santosh Gulia: So that is not a very good idea to go to customer in this particular, I would say, candidate, in this particular way, where we are sending some document, but they have to send it back. Sometimes we just ask for document, and there is no way of only asking documents which are not a standard document

14

00:02:36.360 --> 00:02:47.120

Santosh Gulia: like government Id or other items. So that is very seed, very mistake by the people. We work for design sessions.

15

00:02:48.280 --> 00:03:05.719

Santosh Gulia: And yes, again, I would say, there are very varied requirement from clients region to region. That's why I feel that is very much important, and that I believe, somehow bringing that is not too big of an ask.

16

00:03:06.419 --> 00:03:16.909

David Denham: And yeah, no, that that's interesting. So it sounds like for the background check. There's there's there's a need for, you know, quite a number of documents, and it can vary from customer to customer.

17

00:03:16.910 --> 00:03:21.990

Santosh Gulia: And also also, I've seen customers would want it at various stages.

18

00:03:22.110 --> 00:03:34.679

Santosh Gulia: So it's not only at background check. Sometimes some companies would request that before interview you send me at least this document, so that we will verify when we are interviewing you.

19

00:03:35.520 --> 00:03:35.930

David Denham: So.

20

00:03:35.930 --> 00:03:51.019

Santosh Gulia: So id proof, and this so every business process doesn't allow us to communicate with candidate and ask for document so that way, if if that is some specific customization, and we can manage it through this box would be great idea.

21

00:03:51.740 --> 00:04:00.400

David Denham: Okay? And they just so I understand the the box is that is that on the the Canada home at the moment or.

22

00:04:00.400 --> 00:04:10.020

Santosh Gulia: There is nothing as a box here. I'm just expecting you want me to share screen and tell you on what screen I'm expecting this.

23

00:04:10.530 --> 00:04:21.418

David Denham: And if if you have a handy, yeah, just to just to give me a better, better sense just to yeah, just to to visualize. I think you mentioned review documents as well. So

24

00:04:22.019 --> 00:04:31.580

David Denham: you, you were saying like review documents might not be optimal. Because is it because they have to send multiple review document steps to the candidates.

25

00:04:31.580 --> 00:04:39.500

Santosh Gulia: Yes, I would say at review, if I put it as a review document, step in offer. Bp, particularly.

26

00:04:40.150 --> 00:04:47.570

Santosh Gulia: I am enabling a different Bp, then background check. And sometimes, as I told you, there can be

27

00:04:47.760 --> 00:04:54.869

Santosh Gulia: no background check requirement, but a pre background check requirement like in interview stage.

28

00:04:55.747 --> 00:04:58.909

Santosh Gulia: So various stages we would need

29

00:04:59.100 --> 00:05:03.409

Santosh Gulia: candidate to attach. But my business processes doesn't

30

00:05:03.650 --> 00:05:08.790

Santosh Gulia: allow me to have this additional step where candidate can attach document

31

00:05:09.110 --> 00:05:21.019

Santosh Gulia: plus even offer has this opportunity in offer business process, we can send a document to candidate, and we can with that we can tell them to attach it back

32

00:05:21.130 --> 00:05:29.370

Santosh Gulia: so that functionality is available. But sometimes we are not required to send any document. It's just that we want candidates to attach.

33

00:05:29.840 --> 00:05:34.627

David Denham: Gotcha. Is that the add document functionality just out of curiosity in in offer?

34

00:05:34.970 --> 00:05:39.260

Santosh Gulia: That document is again to recruiter, so that.

35

00:05:39.260 --> 00:05:40.039

David Denham: For the recruiter.

36

00:05:40.040 --> 00:05:53.879

Santosh Gulia: Yeah, that domain is restricted, and we can only enable it to recruiter. So what that allows is recruiter can attach a document from their desktop or and their lo! Local machine, and send it to candidate for review.

37

00:05:54.160 --> 00:06:01.329

Santosh Gulia: But any such step is also not available for candidate. Where recruiter can say, please attach it here.

38

00:06:02.870 --> 00:06:06.219

David Denham: So then, M, oh, yeah, sorry. Sorry. It's just.

39

00:06:07.670 --> 00:06:17.400

David Denham: And so it's just your follow up question, then in terms of the candidate adding documents like the Government? Id, would they typically be adding multiple documents at the same time.

40

00:06:17.700 --> 00:06:24.489

Santosh Gulia: Yes, I would say, the standard document like government id, we can enable that via business process.

41

00:06:24.850 --> 00:06:45.129

Santosh Gulia: That is, absolutely fine. But there are non standard document, where we would ask education, confirmation. And if if sometimes we would ask some certifications, please attach those certifications. These are ad hoc requirements and not a standard requirement by every client, but majorly something or the other.

42

00:06:45.280 --> 00:06:50.889

Santosh Gulia: And when India works on volume, there is also some

43

00:06:51.830 --> 00:07:21.400

Santosh Gulia: firms which are very interested to get Id proofs and multiple other proofs to start interview process just to ensure that they are talking to the right person and all. So that's why, I would say at various stages, client, ask such of thing where? Where they can have these documents? Currently, most of my clients where we could not solve it. For India are going by email way. But that's not

44

00:07:21.400 --> 00:07:24.219

Santosh Gulia: oh, that's great way of managing candidates.

45

00:07:24.550 --> 00:07:25.410

David Denham: Sure. Yeah.

46

00:07:25.410 --> 00:07:27.209

Santosh Gulia: And yeah, yeah.

47

00:07:27.500 --> 00:07:36.190

Santosh Gulia: okay, in the meantime, I have a customer tenant available. Is it good idea to share you and show you.

48

00:07:36.510 --> 00:07:37.020

David Denham: Please.

49

00:07:37.020 --> 00:07:37.750

David Denham: Yeah, yeah.

50

00:07:37.750 --> 00:07:44.440

Santosh Gulia: But yes, I would say, don't don't record this because it's a customer tenant.

51

00:07:45.120 --> 00:07:50.880

David Denham: Okay, let me let me just stop the recording. Actually sorry. Just for this.

52

00:07:51.130 --> 00:07:52.310

David Denham: And.

53

00:07:52.840 --> 00:07:56.120

Santosh Gulia: I'm just trying to show you what what I'm talking about.

54

00:07:56.885 --> 00:07:57.650

David Denham: And

55

00:07:58.120 --> 00:08:21.289

David Denham: you know, thank you for sharing that. So there's 1 follow up question. Then would those documents be specific to the job application or to the candidate. So if the, for example, if the candidate had, let's say, 3 job applications, the the documents they upload would be relevant for all of the job applications, or, you know, would it just be relevant to the candidates, or does it depend.

56

00:08:21.290 --> 00:08:37.399

Santosh Gulia: Depends, I would say, both ways. So if there any specific requirement for that specific job. But yes, again, if you attach that to candidate is also okay. So why I'm saying so, if candidate is being processed for one particular job, Rec

57

00:08:37.460 --> 00:08:54.489

Santosh Gulia: later on, that is, when that gets on hold, and they are processed or moved. For some specific internal reasons they are moved to another job application. These documents stays is better experience for candidate. They would not have to attach it all over again.

58

00:08:55.450 --> 00:09:12.010

David Denham: So it's almost like an ad documents for the candidates and then the candidate can choose whether it's it's job rec related, or if it's just related to to the candidates themselves, by the sounds of us, and if I understand that correctly.

59

00:09:12.010 --> 00:09:13.089

Santosh Gulia: Yes, yes.

60

00:09:13.090 --> 00:09:29.100

David Denham: Okay, interesting. Okay, no, that's that's really useful. I have my research. So far, I have heard, yeah, kind of flexibility around around the background check. It seems like the background check is is quite a, you know, a big topic in in India. And so so again, that's that's really useful.

61

00:09:29.100 --> 00:09:46.799

David Denham: And I suppose, yeah, maybe to to jump from background, check a little bit, maybe just to open it up like, are there any other parts of the the recruiting flow. Where typically, you see, there's there's pain points or challenges. When you know recruiting in in India.

62

00:09:47.010 --> 00:10:01.079

Santosh Gulia: Yes. And now, as you know, the major client in India, which I'm working on, have a great difficulty to go ahead when they get to know that the marketing communication requires opt in.

63

00:10:02.170 --> 00:10:04.570

Santosh Gulia: If you are aware of that feature in the background.

64

00:10:04.850 --> 00:10:06.120

Santosh Gulia: Okay, I would say.

65

00:10:06.120 --> 00:10:06.760

David Denham: No.

66

00:10:06.760 --> 00:10:15.549

Santosh Gulia: Yeah, yeah, I would just explain. And if you get through is good idea. See? We have different kind of emails going to candidate in recruiting.

67

00:10:15.670 --> 00:10:27.059

Santosh Gulia: Some of these are notification related to big business process, which is like someone applies, process their candidature at every stage they will get some notification or the other.

68

00:10:27.350 --> 00:10:39.880

Santosh Gulia: That is okay. That goes to candidate as needed no issues. But there are other part of or other type of emails going to candidate which are called as

69

00:10:40.120 --> 00:10:50.929

Santosh Gulia: marketing communication, that is, if a recruiter wants to send some emails to candidate of example, invite to apply.

70

00:10:52.290 --> 00:11:08.199

Santosh Gulia: So recruiter wants to send 10 jobs and say, Hey, candidate, Santosh Kulya, I feel these are matching jobs for you, please. Would you like to see the details and apply if that interests you, kind of males.

71

00:11:08.540 --> 00:11:26.579

Santosh Gulia: Another example can be the the campaigns, events, and campaigns being used, and they would say, Hey, we have this campus interview campaign available. Please all join this. So that kind of email doesn't directly go to candidate. Why.

72

00:11:26.970 --> 00:11:34.490

Santosh Gulia: As per workday functionality. Their 1st email, which will go to every candidate, is an opt in email.

73

00:11:34.900 --> 00:11:38.179

Santosh Gulia: which is because of European Gdpr.

74

00:11:38.620 --> 00:11:43.560

Santosh Gulia: the this email goes and would say, Hi, candidate.

75

00:11:44.140 --> 00:11:53.950

Santosh Gulia: particular ABC client wants to send these marketing related communications. Please confirm if you want to opt in for these emails.

76

00:11:54.090 --> 00:12:10.049

Santosh Gulia: If a candidate opts in as Yes, I would like to get these emails, the actual email will flow. And thereafter there would no not be questions asked every time recruiter wants to send would go to candidate.

77

00:12:11.020 --> 00:12:16.470

Santosh Gulia: Issue here is, if the candidate says, No, I don't want to

78

00:12:16.890 --> 00:12:21.709

Santosh Gulia: get these emails. The emails would not go. Recruiter would get to know by pop-ups.

79

00:12:22.020 --> 00:12:25.129

Santosh Gulia: But if the candidate does nothing.

80

00:12:25.850 --> 00:12:28.309

David Denham: Then also, the email doesn't go.

81

00:12:29.060 --> 00:12:30.206

David Denham: Okay, okay.

82

00:12:30.780 --> 00:12:38.080

Santosh Gulia: So, my client, and here in India majorly, the recruiters work with

83

00:12:38.530 --> 00:12:49.379

Santosh Gulia: too many candidates in a go. So the volume is so very high. The recruiter doesn't want, or or it's not possible to call every candidate and tell them to opt in.

84

00:12:49.900 --> 00:12:58.240

Santosh Gulia: Secondly, the recommendation here is, if at all, we would be able to make it as an opt out.

85

00:12:58.680 --> 00:13:00.000

Santosh Gulia: which means

86

00:13:00.360 --> 00:13:10.209

Santosh Gulia: we tell candidate, if you want to opt out, please say I opt out. But if the candidate does nothing, then they still get on emails.

87

00:13:10.930 --> 00:13:11.830

David Denham: Okay. Okay.

88

00:13:11.830 --> 00:13:13.480

Santosh Gulia: And to cover this.

89

00:13:13.680 --> 00:13:14.240

David Denham: Yep.

90

00:13:14.240 --> 00:13:21.530

Santosh Gulia: Just to cover this. I also feel that every email goals can have a standard statement that you can click here and opt out.

91

00:13:22.000 --> 00:13:22.720

David Denham: Hmm.

92

00:13:23.160 --> 00:13:26.729

Santosh Gulia: So we are covered legally, plus, we are sending emails.

93

00:13:27.840 --> 00:13:47.360

David Denham: Okay, no, I, I think that's yeah. That's interesting. Because I would imagine with the volumes there with the opt in as it is today, there's probably a lot of a lot of candidates that never get the the email. So it sounds like the European Gdpr is maybe driving. How that works today.

94

00:13:47.400 --> 00:14:00.770

David Denham: Do you know, is it, I think? Is it the Dpd. I think that's the Indian version of Gdp, or is is there any requirements similar to to that for opt in, or is it? Is it more flexible and.

95

00:14:00.770 --> 00:14:25.409

Santosh Gulia: I would say, but yes, if we can handle it by just giving a statement that click here to unsubscribe would be all all good. Moreover, I would say people in India. So I would say the volume of candidates in India. They're not very prompt on emails, so we cannot expect everyone to look at email very effectively and choose what they opt in or what opt out.

96

00:14:25.410 --> 00:14:31.419

Santosh Gulia: But yes, later on they would miss all this communication, and it would be very difficult for the

97

00:14:31.520 --> 00:14:37.149

Santosh Gulia: recruiters to follow up, and yes, they they would lose candidates. In short.

98

00:14:37.150 --> 00:14:38.860

David Denham: Yeah. Okay. Okay.

99

00:14:38.860 --> 00:14:43.729

Santosh Gulia: Yeah, some of the clients are very keen to know if this is a very

100

00:14:44.370 --> 00:14:54.580

Santosh Gulia: legal requirement, I would say this is very important and legal requirement for Gdpr in Europe. Why can't you make it optional for region wise.

101

00:14:55.215 --> 00:14:55.850

David Denham: Yes.

102

00:14:55.850 --> 00:15:01.029

Santosh Gulia: It be for Europe, but open it up as you want it or not, for other countries.

103

00:15:01.780 --> 00:15:03.950

David Denham: Okay, yeah, yeah, no. That that makes sense.

104

00:15:03.950 --> 00:15:04.440

Santosh Gulia: Yeah.

105

00:15:04.440 --> 00:15:05.630

David Denham: Make it configurable.

106

00:15:05.630 --> 00:15:09.740

Santosh Gulia: Open. Yeah, configurable. Very often we have seen that

107

00:15:11.450 --> 00:15:15.860

Santosh Gulia: everyone says we don't want it, but yes, Europe always says we want.

108

00:15:15.860 --> 00:15:16.720

David Denham: Yeah.

109

00:15:17.590 --> 00:15:26.420

David Denham: Yeah. And do you know, for other other companies or competitors, do they have like an opt out type setup rather than this opt in.

110

00:15:26.420 --> 00:15:29.980

Santosh Gulia: Yes, yes, I would say majorly.

111

00:15:30.340 --> 00:15:35.900

Santosh Gulia: apart from what they have seen, everyone says you can unsubscribe.

112

00:15:36.380 --> 00:15:37.979

David Denham: Yeah, yeah, okay.

113

00:15:37.980 --> 00:15:52.710

Santosh Gulia: So we are. That's why I'm coming Tokyo to an extent. If you can make it as an opt out then, or with an unsubscribe option. Every time we are sending each email have that line, and we are legally covered.

114

00:15:53.580 --> 00:16:04.667

David Denham: Yes, yeah, that makes sense. So that's interesting. Yeah. So that like the, it sounds like the the regulations are a bit different in India, and you know, potentially

115

00:16:05.240 --> 00:16:24.590

David Denham: some way to opt out would obviously reach a much higher volume of of candidates. By the by, the sounds of it. So? Yeah, no, that that makes sense. Yeah, are there any other kind of like recurring pain points that. Yeah. You usually see when you're deploying workday recruiting for for customers.

116

00:16:25.930 --> 00:16:32.829

Santosh Gulia: I would say I would sit and jot out jot down a few items that way. I wasn't that ready with these tours.

117

00:16:32.830 --> 00:16:33.430

David Denham: Oh, yeah.

118

00:16:33.430 --> 00:16:34.810

Santosh Gulia: Major major ones.

119

00:16:35.330 --> 00:17:00.079

David Denham: Yeah, no, that I think those 2 are. Those 2 are super super useful. And and yeah, anything you think of after. If if you could send it across, that'd be great. There was a couple couple of other topics that have come up in my research so far, and I don't know if it might might trigger anything in communication. And Whatsapp that you know, that seemed to be something that a lot of our competitors have.

120

00:17:00.750 --> 00:17:01.300

David Denham: and.

121

00:17:01.300 --> 00:17:05.870

Santosh Gulia: I've I've seen that we are going live with Whatsapp in roadmap.

122

00:17:07.810 --> 00:17:08.649

Santosh Gulia: Yeah, we do.

123

00:17:08.650 --> 00:17:09.349

Santosh Gulia: Oh, yeah.

124

00:17:09.359 --> 00:17:18.569

David Denham: Yeah, I I think it was. I think it was pushed back to 26 or 2, as far as I know, but it definitely is on the roadmap. And yeah, just wanted to get a sense.

125

00:17:18.739 --> 00:17:24.309

David Denham: Yeah, no, I I just wanted to get a sense of how widely used Whatsapp is in India, because I know we're.

126

00:17:24.310 --> 00:17:36.399

Santosh Gulia: Everyone uses that, and seriously telling you the current client I'm working with. We have already told that is, it is in roadmap. Just wait. It will happen for you. But I wasn't aware. This is push back.

127

00:17:36.710 --> 00:18:04.040

David Denham: Yeah, I know. I know. I think, that the team working on this there's they have a dependency with the with our Channel engagement team. So they they cover all the communication

tools and things like that. So we know, it's yeah, we know it's a big global. Ask, you know in in Europe as well. Whatsapp is so widely used. So I just wanted to. Yeah, I wanted to get a sense of, you know, when recruiters are communicating with candidates, would you know, would they? Would that be a preferred method to communicate with them via Whatsapp.

128

00:18:04.770 --> 00:18:29.089

Santosh Gulia: Yes, yes, I would say, even means, if you ask me today as well, by Whatsapp is widely used by everyone from shopping platforms to recruiting means, I would say, agencies and whatnot. So Whatsapp is preferred. So normal, I would say the regular messaging is very rarely used in India. Now.

129

00:18:29.130 --> 00:18:38.430

Santosh Gulia: everyone is very spot on Whatsapp. And if you see, everyone who has Internet availability in mobile phone, 90% of them would be using Whatsapp.

130

00:18:38.940 --> 00:19:02.780

David Denham: Okay, no, that that's that's definitely aligns what I what I've heard so far. And I was curious, because I know in Europe, like our version of Whatsapp is is quite basic. So it's just usually used for messaging in India. And can candidates, let's say, apply for jobs or things like that through Whatsapp, or is it? Is it just more the the back and forth communication with it? With a recruiter.

131

00:19:03.030 --> 00:19:20.609

Santosh Gulia: Back and forth. Communication, I would say. Sometimes recruiters also send the links via Whatsapp, because what I have seen but I've actually seen in sometimes my clients or people around me whom I'm talking to. The recruiters use Whatsapp in their system as well their laptops.

132

00:19:21.020 --> 00:19:28.930

Santosh Gulia: and they would send these links to candidates. So it's like very quick and easy for candidates to manage it from the mobile phone

133

00:19:29.090 --> 00:19:36.330

Santosh Gulia: so that way and not not an application via Whatsapp usually. But yes, links are shared via Whatsapp.

134

00:19:36.930 --> 00:19:55.769

David Denham: Perfect, perfect, and maybe just one more question from my side, and I think you mentioned earlier in terms of, like the documents and and things like identity. I just curious if if you ever come across like is identity, fraud, an issue like in terms of knowing the identity.

135

00:19:55.770 --> 00:20:00.270

Santosh Gulia: Yeah, I've I've worked with a partner, which is major major partner.

136

00:20:00.450 --> 00:20:12.569

Santosh Gulia: and we had 7 lakh people in India. So the these Consultancy consultancy firms works with high volume, and I've seen it by myself.

137

00:20:12.610 --> 00:20:37.770

Santosh Gulia: Sometimes there would be fake candidates who would appear on interview, and the moment the candidate joins in as a little means, I would say. Sometimes they were also caught, and legal matters happened. So that's why this ask of getting some confirmation document from candidate before interview was the thing.

138

00:20:38.450 --> 00:20:39.120

David Denham: Gotcha.

139

00:20:39.120 --> 00:20:42.519

Santosh Gulia: We are. We are asking candidates to share, upload

140

00:20:42.740 --> 00:20:57.009

Santosh Gulia: the means. I would say identity proofs, so that whoever is taking interview would be prompted, and would say, See, the Id proof looks like this, are you sure? And there is also a pop up where we would say.

141

00:20:57.160 --> 00:21:01.570

Santosh Gulia: Are you sure the particular person you're interviewing is this.

142

00:21:02.187 --> 00:21:03.729

David Denham: And we have to say, yes.

143

00:21:04.160 --> 00:21:10.511

David Denham: Gotcha gotcha, and I know workday has integrations with background check providers.

144

00:21:11.140 --> 00:21:20.230

David Denham: do they have ones that are suitable for for India, like, what's the quality of those providers that workday is currently integrated with? Do you know.

145

00:21:21.010 --> 00:21:29.359

Santosh Gulia: I would say, usually, when it is involved, we go by additional custom integrations and they work pretty fine.

146

00:21:29.860 --> 00:21:31.180

Santosh Gulia: Okay, okay, boy.

147

00:21:31.180 --> 00:21:42.250

Santosh Gulia: so more of it is on vendor end to make it happen. And yes, I would say, where? Where majority of background check vendors, the big names.

148

00:21:42.710 --> 00:21:44.709

Santosh Gulia: Are pretty good in their work.

149

00:21:44.880 --> 00:21:50.609

Santosh Gulia: plus the integration. If we use custom, integration would be okay. Manageable.

150

00:21:50.610 --> 00:22:10.259

David Denham: Yeah, okay, okay, no. That makes sense. And and just final. Follow up question to that. If we enable the ability, then for candidates to upload those documents. Would those documents go to the recruiter to to do the verification? Or would they go through to the background check and vendor? I just just curious.

151

00:22:11.110 --> 00:22:19.499

David Denham: who would check the documents? If that makes sense? Would they need to go through that background check in integration? Or is it just for the recruiter to to check.

152

00:22:19.500 --> 00:22:22.670

Santosh Gulia: I would say these are more towards a recruiter.

153

00:22:23.130 --> 00:22:49.880

Santosh Gulia: The version where we would need background, check, vendor to manage these, they would have their portals. So we need not worry much on the background check vendors, because if there is an integration which triggers background check for vendor, that vendor would call them vendor would give, give them links to upload documents. So that is quite manage outside workday. But these are kind of some documents

154

00:22:49.960 --> 00:22:55.270

Santosh Gulia: within workday for candidate as the organization would keep a record on.

155

00:22:55.750 --> 00:23:00.278

David Denham: Okay, okay, and final question before we finish, I promise.

156

00:23:00.950 --> 00:23:09.579

David Denham: I saw Santos. If you had a magic wand, and what's the one improvement that if we can make it tomorrow that you'd see, would it be that.

157

00:23:09.580 --> 00:23:10.509

Santosh Gulia: In opt, in.

158

00:23:10.980 --> 00:23:12.810

David Denham: Opt, in okay, interesting, okay.

159

00:23:12.810 --> 00:23:19.180

Santosh Gulia: See, I would say, if a recruiter is sending 2,000 emails, only 100 people will say I opt in.

160

00:23:20.160 --> 00:23:26.589

Santosh Gulia: So we are missing on large volumes there, rather. If you market opt out.

161

00:23:26.710 --> 00:23:31.559

Santosh Gulia: then probably only 200 people will say I opt out. I do not want this communication

162

00:23:32.180 --> 00:23:36.230

Santosh Gulia: so that way the reach becomes a big thing.

163

00:23:37.100 --> 00:23:41.679

David Denham: Yeah, yeah, yeah, I know what you mean. Yeah, so you can source more, more candidates and.

164

00:23:41.680 --> 00:23:55.880

Santosh Gulia: And yet again, when when we are in India, we are working with huge population of people. Wherever the recruiter is reaching out to these people. Maybe they are churning more candidates to figure out a final one.

165

00:23:56.560 --> 00:23:57.670

David Denham: Gotcha. Okay? So that.

166

00:23:57.670 --> 00:24:05.409

Santosh Gulia: Yes, yes, the percentage of how many people recruiters would reach out to one job would be higher here.

167

00:24:05.820 --> 00:24:13.670

David Denham: Okay, okay, no, that's interesting. So no, thank you for that, Santos. I didn't have any other questions. Did you have any questions for myself before we finish up.

168

00:24:14.640 --> 00:24:18.914

David Denham: I'm good. But yes, yes, how I get to know what is being done.

169

00:24:19.663 --> 00:24:20.550

David Denham: So yeah.

170

00:24:20.550 --> 00:24:21.800

Santosh Gulia: So very interested man.

171

00:24:21.800 --> 00:24:49.370

David Denham: Yeah, so so just yeah, just in terms of this, I think great question in terms of this process. So I'm going through similar interviews with lots of different partners, and we're also planning some customer, one to one sessions with with companies who have presence in India as well. So we kind of want to get a sense of where the where the big theme is coming up are but and that will feed. Then into recommendations for our product leadership for our roadmap.

172

00:24:49.380 --> 00:24:59.556

David Denham: So so yeah, it'll be through the roadmap. And that I suppose if you know, whatever the official kind of improvements we we make are but

173

00:24:59.950 --> 00:25:05.909

David Denham: and but yeah, no feel free to reach out anytime as well. Like, if you want kind of more granular updates. You know, I can.

174

00:25:05.910 --> 00:25:06.280

Santosh Gulia: No, no.

175

00:25:06.280 --> 00:25:06.640

David Denham: Yeah.

176

00:25:06.640 --> 00:25:25.390

Santosh Gulia: Yeah, I would wait. I I can look forward. Roadmap. I truly understand how workday works and how all this works. I might have many more items like this. Maybe I would send you across an email. If some some of these excites you, we can talk again. But I'm happy if I can contribute in any way.

177

00:25:26.030 --> 00:25:35.820

David Denham: No, yeah, that that'd be super valuable. Yeah, if you could send them across in in an email, then and then we we can follow up then, if if I need any more information on that, that'd be great.

178

00:25:36.020 --> 00:25:54.790

Santosh Gulia: Yes, it's not on top of my mind. But yes, yes, if I go back and start churning means, I was just like brainstorming. For myself, I would get to know there are so many of these we were like, why, workday is not updating this. Why is this is small. Item, if workday can do this for us.

179

00:25:54.930 --> 00:25:58.159

Santosh Gulia: so that way. There always have been such.

180

00:25:58.830 --> 00:26:13.510

David Denham: Yeah, no, absolutely. I think there's there's definitely some ideas there you've given me from from today. So yeah, anything else that comes to mind, even if it's if it's, you know, a few weeks down the line. If something comes to mind, feel free to to send it across, then I'll take a look.

181

00:26:14.500 --> 00:26:25.709

Santosh Gulia: Thank you. Thank you. But it's an interesting job, means I was like I was happy. At least, it's like workday wants improvements which would help us in long run. Sometimes.

182

00:26:25.710 --> 00:26:26.090

David Denham: Yeah.

183

00:26:26.240 --> 00:26:30.219

Santosh Gulia: Happy that way. If I can contribute, you can consider.

184

00:26:30.220 --> 00:26:51.444

David Denham: Yeah, yeah, absolutely. I think, to be honest, I think it's an exciting time for workday in in India, like, I know, there's lots of of growth in the in the offices there. And I know there's gonna be kind of increased focus on like how we can. You know, improve the product for for India, for our customers in India as well. So I think it's an exciting thing. You're joining a very good time. And and

185

00:26:51.710 --> 00:27:02.629

David Denham: yeah, no, hopefully, we'll catch up again at at some stage and again hugely appreciate all the all the use cases you shared and you know, feel free to send on any others, as well.

186

00:27:03.230 --> 00:27:22.669

Santosh Gulia: Thank you. One more thing I can think of. If if your workday is thinking of a chat bot also, where the candidate can be connected to recruiter, but that is bigger of an ask to consider, then

then, these small changes. But yeah, keep. Keep that in back of your mind. If Workday is working towards that.

187

00:27:23.690 --> 00:27:44.289

David Denham: Yeah, no, we'll do. We? We are doing a bit of work at the moment around like AI agents. And so yeah, it's certainly top of mind in terms of how we could use AI to to help candidates and help recruiters as well. So yeah, what? What I might suggest there that if you could have a think about the.

188

00:27:44.290 --> 00:28:01.590

David Denham: you know, maybe the specific use cases about that kind of candidate to recruiter interactions in the chat bot. And if you could include that in the email that that'd be great like, you know, what type of use cases might the candidate want to do that. And so May. Maybe if you could go back and have a think about that, that'd be great.

189

00:28:01.870 --> 00:28:22.570

Santosh Gulia: Yes, yes, and yes, I've done something like this with the yellow AI. If you know yellow AI is a platform AI platform for Si similar things. So I've done some thing there, and that that worked for one of my clients. So I was like, why, workday doesn't get their own Chatbot.

190

00:28:23.350 --> 00:28:23.690

David Denham: Yeah.

191

00:28:23.690 --> 00:28:38.290

David Denham: yeah, yeah, we at the moment. And we use a vendor called Paradox. No, it's an integration at the moment for for the career sites.

192

00:28:38.290 --> 00:28:39.889

Santosh Gulia: I know I know about Png.

193

00:28:39.890 --> 00:28:40.880

David Denham: Oh, yeah.

194

00:28:40.880 --> 00:28:41.490

Santosh Gulia: Yes.

195

00:28:41.490 --> 00:29:07.870

David Denham: Okay, yeah, yeah. So so that's that's basically kind of what I think, what we have at the moment. But you know, we'll definitely be looking to improve our own native offering within workday and around candidate experience and chat. And AI. So yeah, if there was anything relevant even from the was it yellow, AI. And if there was any anything that you saw there that you know would be useful for us to consider as we're, you know, as we're looking at AI,

196

00:29:07.870 --> 00:29:11.929

David Denham: explain what? What can be one of such use? Case?

197

00:29:11.930 --> 00:29:12.940

David Denham: Yeah, yeah.

198

00:29:12.940 --> 00:29:19.189

Santosh Gulia: Yeah, one of such use case can be every time the candidate wants to know what's happening with my

199

00:29:19.870 --> 00:29:28.979

Santosh Gulia: application. So if if a candidate goes to candidate home. That is more likely to be a standard version of in progress.

200

00:29:30.040 --> 00:29:46.730

Santosh Gulia: But if if a candidate wants to know, they might call recruiter or email recruiter, when recruiter works for so many job requisition, and with a huge inflow of candidate missing an email is quite an possibility.

201

00:29:47.060 --> 00:29:59.139

Santosh Gulia: So if a Chatbot is available and the candidate logs in and would say, Hey, Hi, recruiter. I want to know. Status of my job.

202

00:29:59.600 --> 00:30:08.859

Santosh Gulia: Application, the Chatbot response that thank you. We have done. I understand. We have done 2 rounds of interview. We are waiting for feedback.

203

00:30:08.980 --> 00:30:23.420

Santosh Gulia: and we will let you know by this date, or or just just as generic statement, so that the candidate would be warm and would be settling in. Okay, I'm getting some response sometimes for scheduling also.

204

00:30:23.590 --> 00:30:32.459

Santosh Gulia: So scheduling interview can be done via Chatbot, where this chat Bot asks candidate for their availability.

205

00:30:33.390 --> 00:30:34.100

David Denham: Here.

206

00:30:34.100 --> 00:30:50.389

Santosh Gulia: If workday. Yeah, if workday messaging comes up in Whatsapp, this can be connected to Whatsapp, and we would say, Hey, workday wants to know your availability. These are possible available slots. Would you want to pick one of these or give you give your availability.

207

00:30:50.830 --> 00:30:51.180

David Denham: And.

208

00:30:51.180 --> 00:31:00.470

Santosh Gulia: This communication for scheduling can happen via AI. And internally a recruiter can be notified once the candidate gives availability.

209

00:31:00.910 --> 00:31:24.289

David Denham: Hmm, yes, that. The interview scheduling one is definitely interesting. We we are looking at a used case around around that for potential like interview agent. Where? The yeah, the scheduling pretty much as you described there. And but I think you mentioned Whatsapp as well. I think that that ties back to our Whatsapp conversation earlier as well. So.

210

00:31:24.290 --> 00:31:41.809

David Denham: and because I think, from what I understand, the opening rates, the open message open rates for Whatsapp is quite high for for candidates. So yeah, definitely, an area we're we're keen on in terms of the candidate experience. Because I think, as you mentioned there.

211

00:31:41.820 --> 00:32:10.589

David Denham: The the volumes are so high in India and a recruiter. It's plausible that a recruiter could miss an email. So to have that type of assistance to answer those type of maybe recurring type questions or interview scheduling would potentially save a lot of time for recruiters. But by the sounds of it. So yeah, no, that that makes total sense definitely something I can, you know, feedback to our, to our teams who are looking at the AI agents at the at the moment.

212

00:32:11.750 --> 00:32:15.290

Santosh Gulia: And if I can contribute in any way, I'm so very happy to do that.

213

00:32:15.920 --> 00:32:28.470

David Denham: Yeah, no, really appreciate it. Again, I think super super useful and use cases as well. So and like, I say, yeah, anything else that comes to mind. Please feel free to to email me. And we can. We can catch up again.

214

00:32:28.830 --> 00:32:29.890

Santosh Gulia: Sure, sure.

215

00:32:29.890 --> 00:32:30.650

David Denham: Great.

216

00:32:30.810 --> 00:32:31.950

David Denham: Thank you very much, Santos.

217

00:32:31.950 --> 00:32:35.040

David Denham: Thank you. Bye, thanks very much. Bye, bye.
